

Pizza Sales Dashboard – Project Insights

This document highlights the major business insights identified from the Pizza Sales Dashboard analysis. The insights are derived using sales KPIs, category performance, order trends, and customer purchasing behavior.

Key Performance Indicators (KPIs)

Metric	Value
Total Revenue	\$817,860
Average Order Value	\$38.31
Total Pizzas Sold	49,574
Total Orders	21,350
Average Pizzas Per Order	2.32

Project Insights

- Orders are highest during weekends, especially on Fridays and Saturdays, indicating stronger customer demand during weekend evenings.
- Peak order timings were identified between 12 PM–1 PM and 5 PM–8 PM, showing that lunch and dinner periods contribute maximum sales.
- The Classic pizza category generated the highest number of total orders and sales contribution among all pizza categories.

- 4.** Large-sized pizzas accounted for the maximum revenue contribution, highlighting customer preference toward larger order sizes.
- 5.** Classic Deluxe Pizza emerged as the best-selling pizza with the highest quantity sold.
- 6.** Barbecue Chicken Pizza and Hawaiian Pizza also performed strongly in terms of total sales volume.
- 7.** The Brie Carre Pizza recorded the lowest sales performance, making it the least preferred pizza item.
- 8.** The dashboard indicates that customers generally purchase more than two pizzas per order, as reflected by the average pizzas per order value of 2.32.
- 9.** Sales contribution across pizza categories remained relatively balanced, with Classic and Supreme categories slightly outperforming others.
- 10.** The analysis helps identify peak business hours, top-performing products, and low-performing menu items, supporting better business decision-making.

The Pizza Sales Dashboard successfully provides actionable business insights through interactive visualizations and KPI tracking. The analysis can help improve inventory planning, customer targeting, product strategy, and overall sales performance.
